RELEVANT EXPERIENCE

Front-End Development Bootcamp

Wild Code School | 2021

- Twilio Hackaton
During the Twilio hackathon, I collaborated with a team to conceive, design, and develop a web-based platform aimed at assisting individuals in locating nearby COVID-19 vaccination spots. This project encompassed the entire software development lifecycle, from ideation to deployment. In response to the global pandemic, our team recognized the need for accessible information regarding vaccination centers.

C# .NET Development

Epam Systems | 2023

- Completing extensive C# and .NET training honed my skills in coding with C#, comprehending the .NET framework, and implementing industry-standard practices in application development. This training also enhanced my teamwork abilities, fostering collaboration through group projects and agile methodologies within a development environment. Additionally, I acquired expertise in Git for version control, proficiently managing codebase changes and ensuring project coherence across the development cycle.
